

The screenshot displays a Tableau dashboard with four visualizations:

- Regional Sales Forecast:** A line chart showing sales and profit for various regions (Africa, Canada, Caribbean) over 15 months. The y-axis represents sales/profit in thousands (K), and the x-axis represents months.
- Sales and Profit by Order\_month:** A line chart showing sales and profit over 15 months. The y-axis represents sales/profit in millions (M), and the x-axis represents months.
- Country wise sales:** A word cloud visualization showing the relative sales volume for various countries, with the United States and Australia being the most prominent.
- Regional Sales by Segment:** A radar chart showing sales performance across different segments (Consumer, Corporate, Home Office) for various regions (Canada, Africa, West, Southeast Asia, South, Oceania, North Asia, North, East, EMEA, Central Asia, Central, Caribbean).
